Operation

With DALI master

1. DALI Address

1 DALI address for 2 channels output are assigned by DALI Master controller automatically, please refer to user manuals of compatible DALI Masters for specific operations.

With NFC Programming devices

Note

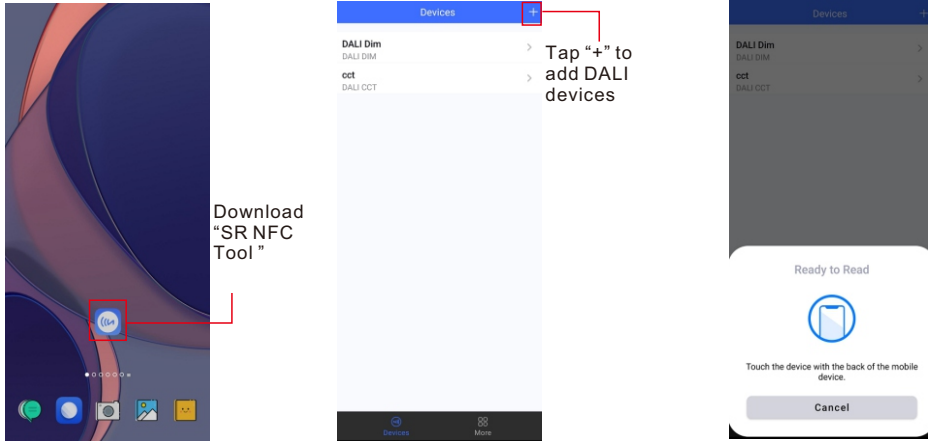

1) Do wiring according to the wiring diagram and power on the DALI system .

2) Recommend setting parameters without power-on the DALI devices .

2) Please make sure your mobile phone has NFC function and enable it .

Working with “SR NFC Tool” APP

Step 1: Download the APP (searching “SR NFC Tool” from App Store and Google Play) .
Then open the APP .

Download
"SR NFC
Tool"

- Note:**
1. Please Make sure that you have enabled NFC function with your mobile phone/ tablet .
 2. Please Make sure that the "NFC position" is matched.
 3. Please do not power on the device before setting.
 4. If you can't download "SR NFC Tool". Please contact with us.

Step 2: Add device, and name it as you wish.

Step 3: Unlock device, enter parameters configuring page.

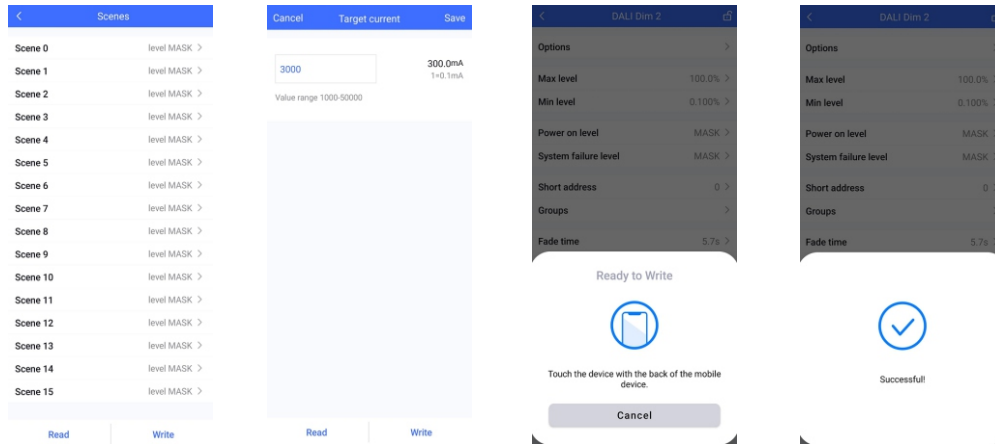

- Note:**
1. You have to unlock the device then do some settings
 2. Only when the corresponding function is selected, the function interface will be displayed.

Step 4: Few parameter interface, you can choose the setting based on your requirements.

Step 5: After setting, please save the selected configuration via NFC and power on the device.

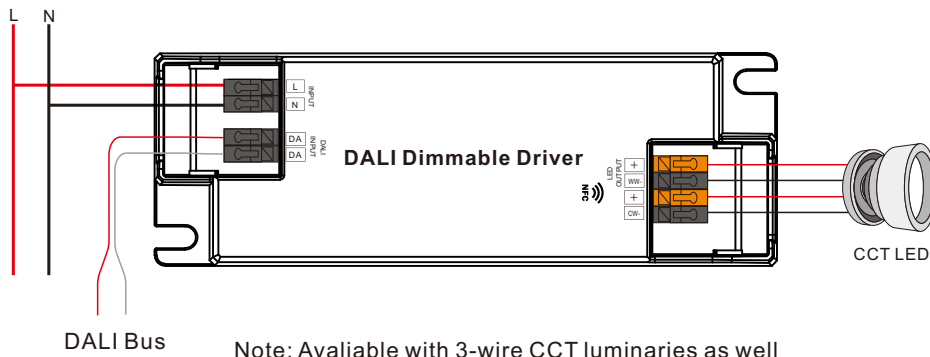

Tips

1. **NFC function doesn't require any power driver.**
2. **Many functions can be configured by NFC. Kindly check your desired functions.**
3. **All of our DALI drivers are in the best performance within our DALI master/ DALI IoT gateway.**
4. **This is a 2-channel output product, so we recommend ensuring that both loads are connected and have the same loads for each channel at the same time during testing.**
 - 4.1 If you have to connect 1 channel to test, please follow the following moves (**before powering on**).
 - 4.1.1 If you are connected to "+/WW" (signal channel), please make sure to set "**power on CCT**" of NFC Driver to 2700k (DALI default value), and write to the device.
 - 4.1.2 If you are connected to "+/CW" (signal channel), please make sure to set "**power on CCT**" of NFC Driver to 6500k (DALI default value), and write to the device.

Note:

1. Those MCB parameters are based on ABB S200 series circuit breakers.
2. For different brands and models of miniature circuit breakers, the quantity of drivers will have difference.
3. Please do not exceed the above-mentioned quantity during on-site installation, and the specific load quantity shall be subject to on-site installation.
4. When the installation environment temperature of MCBs exceeds 30°C or when multiple MCBs are installed side by side, the number of mounted drives will be reduced, which requires recalculation.
5. Type C MCB's are strongly recommended to use with LED lighting
