

## 0-10V BLE PIR Sensor Controller with 3.5mm Audio-Jack Interface

**Important:** Read All Instructions Prior to Installation

### Features

- Bluetooth to 0-10V signal PIR sensor controller, Bluetooth® mesh network
- Mesh network, which has a much longer control distance, transmits received signals to neighboring devices
- All devices on 0-10V line are broadcast controlled by mobile application
- Supporting our kinetic energy switches and EnOcean switches EWSSB and EWSDB
- In typical indoor environment, the typical range for wireless communication is 20m to 25m . Actual range is dependent on field installation.
- Standby power consumption less than 0.5W, meet latest ERP regulation
- 3.5mm audio-jack interface (plug & play)
- Available with Magnetic reset
- On-board antenna
- Waterproof grade: IP20
- 5 years warranty

### Parameters

Input	Power	12-24VDC
	Signal	Bluetooth
Output	Signal	0-10V
Control	Dimming Curve	Logarithmic
	Dimming Method	PWM
Environment	Operating Temperature	0°C~+45°C
	Relative Humidity	8% to 80%
Others	Size	See dimensions

### Product info

① **Green LED indicator (inside housing):** Flashes during commissioning

② **Red LED indicator (inside housing):** Flashes when motion is detected

③ **Light sensor:** Ambient light detection and daylight harvesting

④ **PIR lens**

⑤ **Magnetic reset area:**

**a)** Bring the magnet close once to turn the device ON or OFF. If the device is connected to the network, the green indicator stays on for 3s. If not connected, the green indicator flashes quickly 6 times.

**b)** To reset the device, hold the magnet near for over 3s until the green indicator starts flashing quickly, then remove it. After reset, the green indicator flashes slowly 3 times, and the connected load light also flashes slowly 3 times.

### Operation

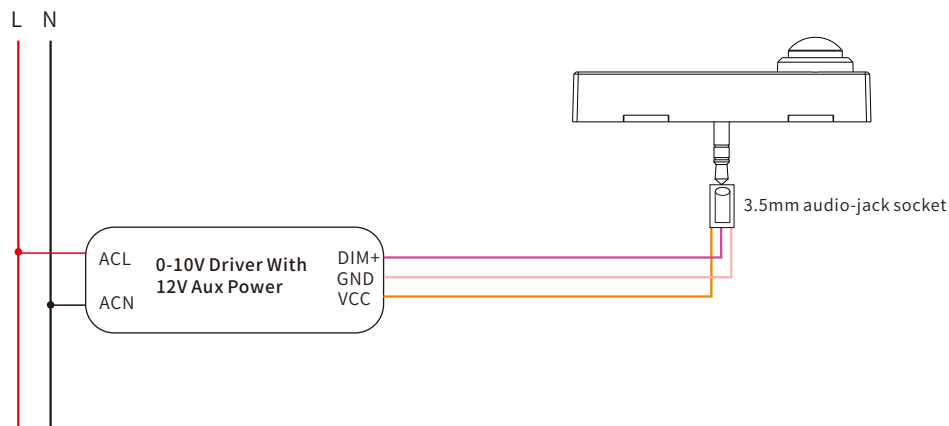

- Do wiring according to connection diagram.
- Kindly refer to “SunSmart Commissioning User Manual” for further pairing.
- Available with Magnetic reset

**Warning** DO NOT expose the device to moisture.  
DO NOT install with power applied to device.

## Dimension

## Wiring

Note: please make sure the polarity of 0-10V signal of the sensor is correctly connected.

## Application

## Specification

### ENERGY SAVINGS

- Low/High-end trimming
- Daylight harvesting
- Occupancy/Vacancy detection
- Auto and advanced demand response programs
- Time-of-Day dimming schedule
- Energy monitoring

### SENSING

- Mounting height: 2.5m
- Detection area diameter: 5m @ 2.5m

### COMFORT & CONVENIENCE

- Advanced occupancy detections
- Light-level stability
- Configurable dim-and-linger occupancy
- Personalized setting profile
- Work with kinetic switch keypad and dimmer wallstation
- Multi-scenes control

### ENVIRONMENT & APPROBATION

- Operating temperature: 0°C to 45°C
- Agency approbations: UL Listed /FCC/ CE/ IC...
- Warranty: 5 years

## Detection Pattern

Coverage Side View

Coverage Top View

The detection area for movement can be roughly divided into two parts:

- Slow movement (person moving  $< 1.0'/s$  or  $0.3m/s$ )
- Quick movement (person moving  $> 1.3'/s$  or  $0.4m/s$ )

## Installation Precautions

- Avoid areas with frequent temperature changes: Keep away from air conditioners, fans, refrigerators, ovens, and other objects that cause rapid temperature changes. The detection effectiveness of PIR motion sensors is closely related to temperature fluctuations, and vents or heat sources can lead to false alarms.
- Avoid areas with significant air flow.
- Avoid facing glass doors and windows directly: 1) Do not face glass doors and windows directly to avoid interference from strong light. 2) Avoid complex environments outside doors and windows, such as direct sunlight, crowds, and moving vehicles.
- Avoid installing opposite large, constantly moving objects: Large objects with significant motion can cause sudden changes in airflow within the detection area, leading to false alarms. Outdoor PIR motion sensors should not be installed opposite large trees or tall bushes.
- Avoid areas with screens, furniture, large potted plants, or other obstacles within the detection range.
- Avoid areas exposed to direct sunlight.

## Update Log
