ZigBee Wireless RGBW Remote

zigbee certified product   CE   FC   RoHS COMPLIANT

Important: *Read All Instructions Prior to Installation*

Function introduction

Click to turn on the paired lighting devices
Press and hold down to search and pair to ZigBee network or factory reset the dimmer switch

Brightness up button, press and hold down to increase light intensity

When controls RGB+CCT light devices, keep short pressing to turn on CCT channels and get 25% ww+75% cw, 50% ww+50% cw, 75% ww+25% cw, 100% ww+0% cw, 0% ww+100% cw one by one. Press and hold to adjust color temperature smoothly.

When controls RGBW light devices, keep short pressing to turn on the 4th channel W and get 25%, 50%, 75%, 100%, 0% intensity one by one. Press and hold to adjust W channel light intensity smoothly.
Click to turn off the paired lighting devices

Brightness down button, press and hold down to decrease light intensity

RGB color button, click to get R, G, B one by one, press and hold down to cycle RGB colors

Scene buttons, press and hold down to save a scene, click to recall the saved

Note: This switch supports 1 group for binding max. 30 lighting devices.

Product Data

Protocol	ZigBee 3.0
Operation Voltage	3VDC (CR2450)
Transmission Frequency	2.4GHz
Transmission Range (free field)	30m
Protection Type	IP20
Dimming Range	0.1%-100%
Dimensions	71.2x71.2x13.6mm

• ZigBee RGBW remote based on ZigBee 3.0
• Enables to pair ZigBee lighting devices via touchlink commissioning without coordinator
• Supports find and bind mode to pair with ZigBee lighting devices
• Supports 1 group for binding max. 30 lighting devices
• 2.4 GHz global operation
• Long battery life mesh technology
• Transmission range up to 30m
• Compatible with universal ZigBee Gateway products
• Compatible with universal RGBW, RGB+CCT ZigBee lighting devices

ZigBee Clusters Supported by This Remote Are As Follows:

Input clusters:

• Basic   • Power Configuration   • Identify   • Diagnostics

Output clusters:

• Identify   • Scenes   • On/off   • Level control   • Ota   • Color control

Safety & Warnings

• This device contains a button lithium battery that shall be stored and disposed properly.
• DO NOT expose the device to moisture.
• Do not ingest battery, Chemical Burn Hazard
• This product contains a coin / button cell battery. If the coin / button cell battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death
• Keep new and used batteries away from children.
• If the battery compartment does not close securely, stop using the product and keep it away from children.
• If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention

Quick Start (Simplified operation compared to standard operations in the part "Operation")

Touchlink: Press and hold down both keys for 3 seconds to start touchlink and link light device.

Factory reset: click both buttons 3 times to reset the remote (the remote should already be paired to a gateway).
Network pairing mode: click both buttons 3 times to set the remote into network pairing mode (the remote should not belong to any gateway network).

Operation

1.This ZigBee RGBW remote is a wireless transmitter that communicates with a variety of ZigBee compatible systems. This transmitter sends wireless radio signals that are used to remotely control a compatible system.

2.This ZigBee remote supports 1 group for binding max. 30 lighting devices and enables to control RGB ZigBee lighting devices.

3. Zigbee Network Pairing through Coordinator or Hub (Added to a Zigbee Network)

LED indicator

Step 1: Remove the remote from previous zigbee network if it has already been added to it, otherwise pairing will fail. Please refer to the part "Factory Reset Manually".

Step 3: Press and hold down until LED indicator turns on.
Step 2: From your zigbee controller or hub interface, choose to add device or accessory and enter Pairing mode as instructed by the controller.
Step 4: Immediately short press to search nearby network, indicator flashes every 1 second, 20 seconds timeout if there is no network. Indicator will then blink 5 times quickly for successful pairing.

Note: 1) After pairing successfully, the remote information will appear on the controller or hub interface.
2) No remote information will appear on the hub interface if pairing to some Zigbee hubs.

4. TouchLink to a Zigbee Lighting Device

LED indicator

Step 2: Bring the remote within 10cm of the lighting device.

Step 1: Set the zigbee lighting device to start TouchLink commissioning, please refer to its manual to learn how.

Step 3: Press and hold down until LED indicator turns on.

< 10cm

ZigBee Lighting Device

Step 4: Immediately short press to start TouchLink commissioning of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful pairing to the device and the light connected to the device will blink twice.

Note: 1) Directly TouchLink (both not added to a ZigBee network), each remote can link with 30 devices.
2) TouchLink after both added to a ZigBee network, each remote can link with max. 30 devices.
3) To control by both gateway and remote, add remote and device to network first then TouchLink.
4) After TouchLink, the remote can control the linked lighting devices.

5. Removed from a Zigbee Network through Coordinator or Hub Interface

From your ZigBee controller or hub interface, choose to delete or reset the remote as instructed, indicator flashes 3 times quickly to indicate successful removing.

6. Factory Reset Manually

LED indicator

Step 1: Press and hold down until LED indicator turns on.

Note: All configuration parameters will be reset after the remote is reset or removed from the network.

Step 2: Immediately short press 5 times continuously, indicator flashes 3 times quickly to indicate successful reset.

7. Remove a Touchlink Paired ZigBee Lighting Device

LED indicator

Step 1: Set the Touchlink paired zigbee device to start TouchLink commissioning, please refer to its manual to learn how.

**Step 3**: Press and hold down until LED indicator turns on.

Step 2: Bring the remote within 10cm of the lighting device.
< 10cm

ZigBee Lighting Device

Step 4: Immediately short press twice to start TouchLink removing of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful removing.

8. Factory Reset a Lighting Device (Touch Reset)

Note: the device shall be added to a network, the remote added to the same one or not added to any network.

LED indicator

Step 1: Set the zigbee device to start TouchLink commissioning, refer to its manual.

Step 2: Bring the remote within 10cm of the lighting device.

< 10cm

ZigBee Lighting Device

Step 3: Press and hold down until LED indicator turns on.

Step 4: Immediately short press 5 times to start Touch Reset of the remote. LED indicator flashes fast for 3S, then flash 3 times slowly to indicate successful reset.

9. Find and Bind a Zigbee Lighting Device

Note: Make sure the device and remote already added to the same zigbee network.

LED indicator

ZigBee Lighting Device

Step 1: Start find and bind mode on the Zigbee lighting device (initiator node) and enable it to find and bind target, refer to its manual.

Step 3: Short press to enable the remote (target node) to find and bind initiator.LED indicator flashes 4 times for successful binding or twice if binding fails.

**Step 2**: Press and hold down until LED indicator turns on.

Note: Each remote can bind max. 30 lighting devices.

10. Find and Unbind a Zigbee Lighting Device

LED indicator

ZigBee Lighting Device

Step 1: Start find and bind mode on the Zigbee lighting device (initiator node) and enable it to find and bind target, refer to its manual.

Step 3: Short press twice to enable the remote (target node) to find and unbind initiator. LED indicator flashes 4 times for successful unbinding or twice if unbinding fails.

Step 2: Press and hold down until LED indicator turns on.

11. Clear All Find and Bind Mode Paired Lighting Devices

LED indicator

Step 1: Press and hold down until LED indicator turns on.

Step 2: Short press 5 times continuously to clear all bound lighting devices . LED indicator flashes 4 times for successful unbinding.

12. Setup a Network & Add Devices to the Network (No Coordinator or Hub Required)

Step 1: Factory reset the remote and the lighting device, refer to their manuals.

LED indicator

Step 2: TouchLink the remote and device to setup a network, refer to their manuals.

Step 3: Press and hold down until LED indicator turns on.

< 10cm

ZigBee Lighting Device

Step 4: Short press button to enable the network to discover and add devices, LED indicator will flash twice. 180 seconds timeout, repeat the operation.

Step 5: Set another remote into network pairing mode and pair it to the network, refer to its manual.

Step 6: Add more remotes to the network as you would like.

Step 7: Factory reset the lighting devices that you would like then add them to the network, refer to their manuals.

Step 8: Touchlink to pair the added remotes and lighting devices, refer to their manuals. Each remote can link with max. 30 lighting devices. Each lighting device can be linked by max. 30 remotes.

13. OTA

The remote supports firmware updating through OTA, and will acquire new firmware from zigbee controller or hub every 10 minutes automatically.

14. How to Check Whether the Remote Belongs to a Network or not

Short press any button, indicator blinking means the remote has already been added to a network. No blinking of indicator means the remote does not belong to any network.
15. Battery Power Monitor Function

The remote will report battery power value to the coordinator under following situations:
• When powered on.

• When short pressing both brightness up button ☼ and brightness down button ☼ simultaneously.

• When operating the switch to send data packets (over 4 hours since last operation).

• When added to the network by a coordinator.

Installation

1.Remove battery insulator

① Use tool to open the silicone gel battery cover

②Pull out the battery insulator

③Install the silicone battery cover back

2.Install the controller to wall(2 methods)

Method 1: Stick 3M glue on the back of the bracket and then stick the bracket to the wall

Method 2: Screw the bracket to the wall

After the bracket is fixed,clip the frame and control part to the bracket in sequence

Mounting

The key part of this controller is an universal one, especially rotary standard switch element that can be integrated in numerous frames by different manufactures as below list:

BERKER	S1, B1, B3, B7 glass
GIRA	Standard55, E2, Event, Esprit
JUNG	A500, Aplus
MERTEN	M-smart, M-Arc, M-Plan

CAUTION
Risk of explosion if the battery is replaced by an incorrect type

– replacement of a battery with an incorrect type that can defeat a safeguard (for example, in the case of some lithium battery types);

– disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;

– leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas;

- a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
