different luminaries specification

- 1) Enable Pairing: The driver will enter the pairing mode and work with RF remote
- 2) Clear all paired devices: Cleaning paired devices (Seldom use)
- 3) Ignore: When you about to set other parameter please select this, otherwise the devices statues shall be re-write which is not your willing.

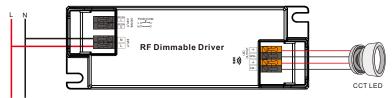

Tips

- 1. NFC function doesn't require any power driver.
- 2. Many functions can be configured by NFC. Kindly check your desired functions.
- 3. All of our RF NFC drivers are in the best performance within OUR Remotes.
- 4. This is a 2-channel output product, so we recommend ensuring that both loads are connected and have the same loads for each channel at the same time during testing.
- 5. For 1 channel fixtures, please make sure you have our 1 channel drivers connected.
- 6: Read before you Move.

Wiring Diagram

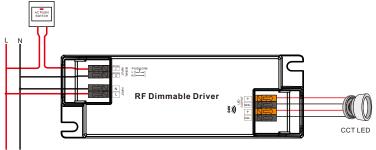

1. Work as Pure RF driver

1.1 With 4-wire CCT LED luminarie

Note: Avaliable with 3-wire CCT luminaries as well

2. Work with Pure RF driver and AC PUSH function

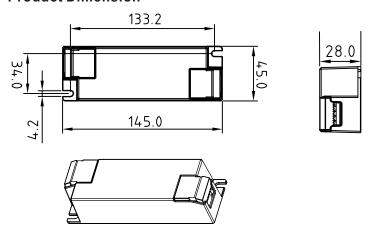

Note: Avaliable with 3-wire CCT luminaries as well

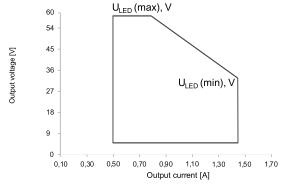

AC Push Function

- 1) Click the button to switch ON/OFF
- 2) Press and hold down the button to increase or decrease light intensity to desired level and release it, then repeat the operation to adjust light intensity to opposite direction. The dimming range is from 1% to 100%.
- 3) Double click the button to switch between brightness mode and color temperature mode.
- 4) Press and hold down the button to change color temperature under color temperature mode.

Note:

- 1. Those MCB parameters are based on ABB S200 series circuit breakers.
- 2.For different brands and models of miniature circuit breakers, the quantity of drivers will have difference.
- Please do not exceed the above-mentioned quantity during on-site installation, and the specific load quantity shall be subject to on-site installation.
- 4.When the installation environment temperature of MCBs exceeds 30°C or when multiple MCBs are installed side by side, the number of mounted drives will be reduced, which requires recalculation.
- 5. Type C MCB's are strongly recommended to use with LED lighting
