• In compliance with IEC 62386-101:2014, IEC 62386-102:2014, IEC 62386-207 Ed2, IEC 62386-209:2011

Built-in DALI-2 interface, DALI DT8 device

- Dimmable LED driver. Max. output power 15W
- + 100-700mA current selectable via NFC program tool. Min.current gear lower to 0.1mA
- DALI Address/Group/Scene setting via NFC program tool.
- \bullet Class ${\rm I\!I}$ power supply, full isolated plastic case
- High power factor and efficiency
- $\ensuremath{\bullet}$ To switch and dim Tunable White LED lighting fixtures
- Amplitude/CCR dimming, smooth and deep dimming
- \bullet Compatible with universal DALI masters that support DT8 commands
- Error report function
- DALI-251/252/253 Enabled, DALI data inside
- \bullet IP20 rating, suitable for indoor LED lighting applications
- 5 years warranty

Safety & Warnings

• DO NOT install with power applied to the device.

• DO NOT expose the device to moisture.

Operation

With DALI master

1. DALI Address

1 DALI address for 2 channels output are assigned by DALI Master controller automatically, please refer to user manuals of compatible DALI Masters for specific operations.

With NFC Programming devices

Note

1) Do wiring according to the wiring diagram and power on the DALI system .

- 2) Recommend setting parameters without power-on the DALI devices .
- 2) Please make sure your mobile phone has NFC function and enable it .

Working with "SR NFC Tool" APP

Step 1: Download the APP (searching "SR NFC Tool" from App Store and Google Play). Then open the APP.

Note: 1. Please Make sure that you have enabled NFC function with your mobile phone/ tablet

- 2. Please Make sure that the "NFC position" is matched.
- 3. Please do not power on the device before setting.

4. If you can't download "SR NFC Tool". Please contact with us.

Step 2: Add device, and name it as you wish.

Tips

- 1. NFC function doesn't require any power driver.
- 2. Many functions can be configured by NFC. Kindly check your desired functions.
- 3. All of our DALI drivers are in the best performance within our DALI master/ DALI IoT gateway.

4.This is a 2-channel output product, so we recommend ensuring that both loads are connected and have the same loads for each channel at the same time during testing.

4.1If you have to connect 1 channel to test, please follow the following moves (before powering on).

4.1.1If you are connected to "+/WW" (signal channel), please make sure to set <u>"power on CCT"</u> of NFC Driver to 2700k (DALI default value), and write to the device.

4.1.2If you are connected to "+/CW" (signal channel), please make sure to set <u>"power on CCT"</u> of NFC Driver to 6500k (DALI default value), and write to the device.

Wiring Diagram

1. With DALI bus

1) With 3-wire CCT LED luminarie

2. With AC PUSH dimmer

AC Push Function

1) Click the button to switch ON/OFF

2) Press and hold down the button to increase or decrease light intensity to desired level and release it, then repeat the operation

to adjust light intensity to opposite direction. The dimming range is from 1% to 100%.

3) Double click the button to switch between brightness mode and color temperature mode.

4) Press and hold down the button to change color temperature under color temperature mode.

The LED driver is designed for a lifetime stated above under reference conditions . The relation of tc to ta temperature depends also on the luminaire design.

Note:

1. Those MCB parameters are based on ABB S200 series circuit breakers.

2.For different brands and models of miniature circuit breakers, the quantity of drivers will have difference.

 Please do not exceed the above-mentioned quantity during on-site installation, and the specific load quantity shall be subject to on-site installation.

4.When the installation environment temperature of MCBs exceeds 30°C or when multiple MCBs are installed side by side, the number of mounted drives will be reduced, which requires recalculation.

5. Type C MCB's are strongly recommended to use with LED lighting
