## Operation

With DALI master

## 1. DALI Address

1 DALI address for 1 channel output are assigned by DALI Master controller automatically, please refer to user manuals of compatible DALI Masters for specific operations.

Note

1) Do wiring according to the wiring diagram and power on the DALI system .
2) Recommend setting parameters without power-on the DALI devices.
3) Please make sure your mobile phone has NFC function and enable it

Working with "SR NFC Tool" APP
Step 1: Download the APP (searching "SR NFC Tool" from App Store and Google Play). Then open the APP

Note: 1. Please Make sure that you have enabled NFC function with your mobile phone/ tablet.
2. Please Make sure that the "NFC position" is matched
3. Please do not power on the device before setting.
4. If you can't download "SR NFC Tool". Please contact with us.

Step 2: Add device, and name it as you wish.

## Step 3: Unlock device, enter parameters configuring page

Note: 1. You have to unlock the device then do some settings
2. Only when the corresponding function is selected, the function interface will be displayed

Step 4: Few parameter interface, you can choose the setting based on your requirements.

Step 5: After setting, please save the selected configuration via NFC and power on the device

## Tips

1. NFC function doesn't require any power driver.
. Many functions can be configured by NFC. Kindly check your desired functions.
