The LED driver is designed for a lifetime stated above under reference conditions.
The relation of tc to ta temperature depends also on the luminaire design.
MCB Load Quantity

Module Number	Ipeak	Twidth	Max.quantity of LED Driver per MCB													
			B10	B13	B16	B20	B25	C10	C13	C16	C20	C25	D10	D13	D16	D20	D25

Note:

1. Those MCB parameters are based on ABB S200 series circuit breakers.

2. For different brands and models of miniature circuit breakers,
   the quantity of drivers will have difference.

3. Please do not exceed the above-mentioned quantity during on-site
   installation, and the specific load quantity shall be subject to on-site
   installation.

4. When the installation environment temperature of MCBs exceeds 30°C
   or when multiple MCBs are installed side by side, the number of
   mounted drives will be reduced, which requires recalculation.

5. Type C MCB's are strongly recommended to use with LED lighting
